

GREENGUARD CERTIFICATION

www.greenguard.org

What is GREENGUARD Certification?

GREENGUARD Certification demonstrates that a product is low-emitting. Products carrying the GREENGUARD mark have been independently tested and re-tested to demonstrate that they meet GREENGUARD's rigorous third-party chemical emissions standards.

Why is Indoor Air Quality Important?

Whether inside a home, school, business or hospital, people expect their indoor environments to be healthy and safe. Unfortunately, indoor spaces are often filled with potentially harmful pollutants.

GREENGUARD Children & Schools CertifiedSM products have been screened for over 10,000 chemicals to help ensure that they will contribute to the creation of healthier indoor environments. Products bearing this mark are well suited for use in sensitive environments such as healthcare facilities.

GREENGUARD Children & Schools Certified furniture contributes to LEED® for HealthcareTM MR Credit 4, Option 2. It also contributes to IEQ Credit 4.5 in all other LEED rating Systems.

Exposure to chemical emissions from furniture and other products can contribute to a variety of health issues. Selecting low-emitting materials and furnishings is particularly critical in healthcare environments, because people who are immunocompromised are more susceptible to negative impacts of chemical exposure.

La-Z-Boy Contract Furniture is all GREENGUARD

All La-Z-Boy Contract Furniture Business and Healthcare products have achieved GREENGUARD Indoor Air Quality Certification® and GREENGUARD Children & Schools Certification. Both GREENGUARD Certifications signify that all our products are now in compliance with the stringent emission guidelines set by GREENGUARD Environmental Institute.

This is an extremely important achievement for La-Z-Boy Contract Furniture and exemplifies our commitment and dedication to the environment. La-Z-Boy Contract Furniture is fully entrenched in the full meaning of being a "good steward" of this place we live and work called earth. The company is dedicated to sound environmental policies that help preserve the environment not only for those of us that live and enjoy this today but also for future generations.
